Project Design Phase
Problem – Solution Fit Template

Date	06-04-2026
Team ID	
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The current library system follows a manual process for book requests and approvals, which leads to delays, lack of transparency, and difficulty in tracking borrowed books. Students face challenges in requesting books efficiently, and librarians spend more time managing requests manually. There is a need for an automated system to streamline the process and improve efficiency.

Purpose:

- To automate the library book request and approval process
- To reduce manual effort and errors
- To provide faster and more efficient service to students
- To improve tracking and management of borrowed books
- To enhance communication through automated notifications
