Ideation Phase
Brainstorm & Idea Prioritization Template

Date	06 April 2026
Team ID	69bd2f9cc71a9ebd6a50e3b1
Project Name	Smart Library request workflow in Servicenow
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

- Brainstorming and idea prioritization is an important step in developing the Smart Library Request Workflow. It helps identify problems in the current library system and generate efficient digital solutions using ServiceNow.
- This phase ensures that the most impactful and feasible idea is selected for implementation.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The team collaborated to analyze existing issues in traditional library systems. Several challenges were identified:

- Manual book request process
- No real-time tracking of requests
- Delays in approval from librarians
- Lack of centralized system
- Poor communication between users and admin

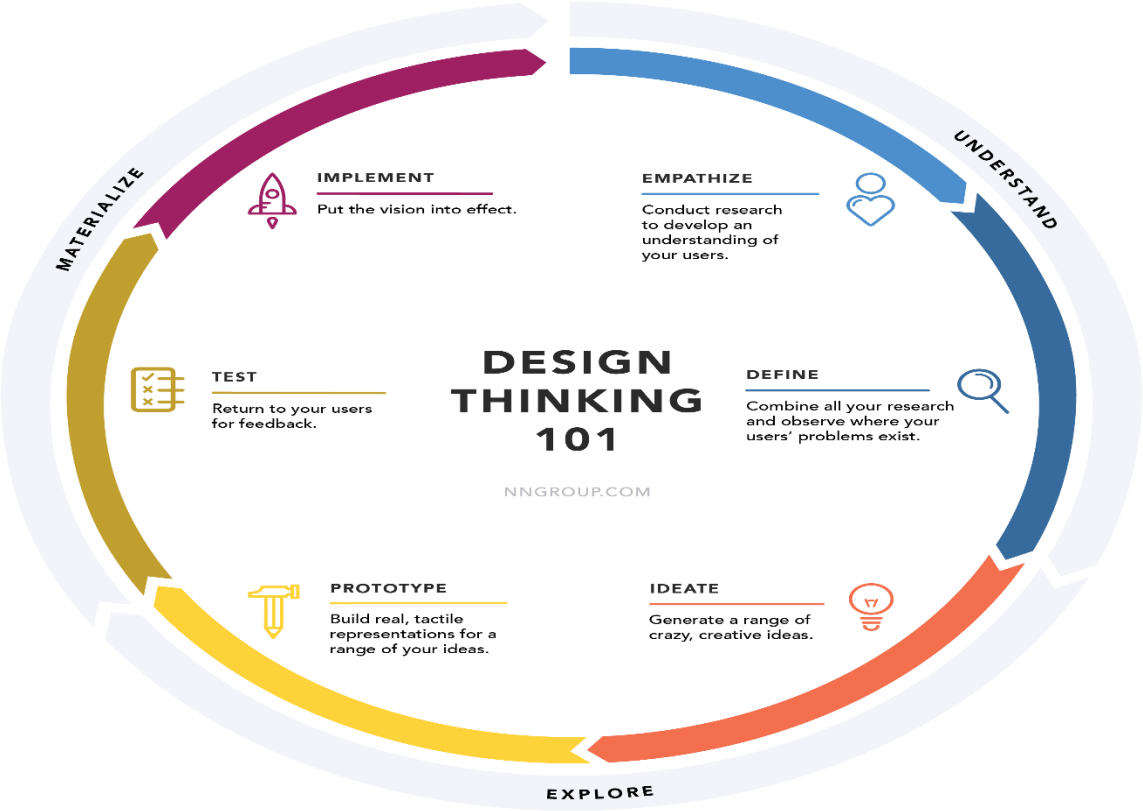
Step-2: Brainstorm, Idea Listing and Grouping

During brainstorming, multiple ideas were generated to solve the identified problem:

- Online book request form
- Automated approval workflow
- Notification system (Email alerts)
- Book availability tracking

- User dashboard for request status
- Admin panel for managing requests

All ideas were collected without filtering to encourage creativity and innovation.



Step-3: Idea Grouping

The generated ideas were grouped into categories:

<u>User Features</u>

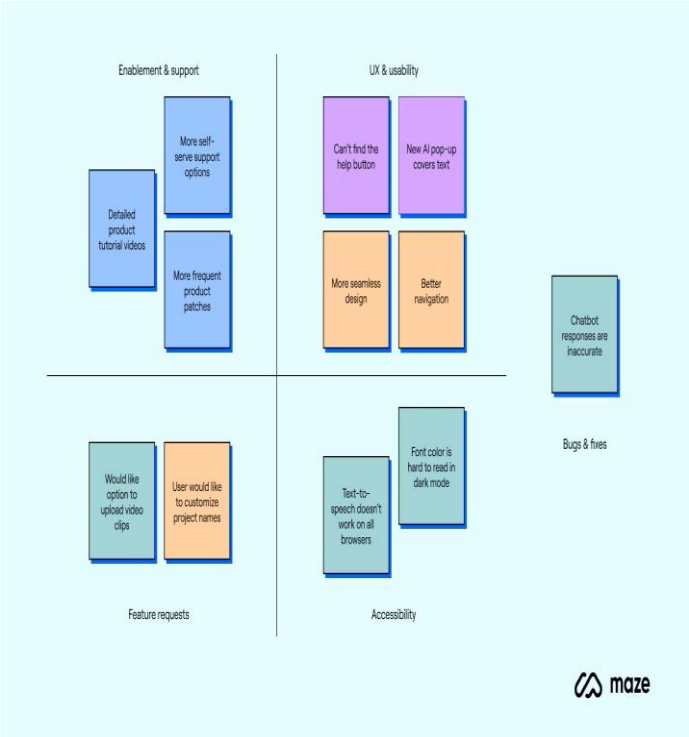
- Book request form
- Request tracking

<u>Admin Features</u>

- Approval/rejection system
- Request management

<u>System Features</u>

- Notifications



- Database storage

This grouping helped in organizing the ideas logically and understanding system requirements.

Step-4: Idea Prioritization

The ideas were evaluated based on:

- Feasibility
- Impact
- Implementation complexity

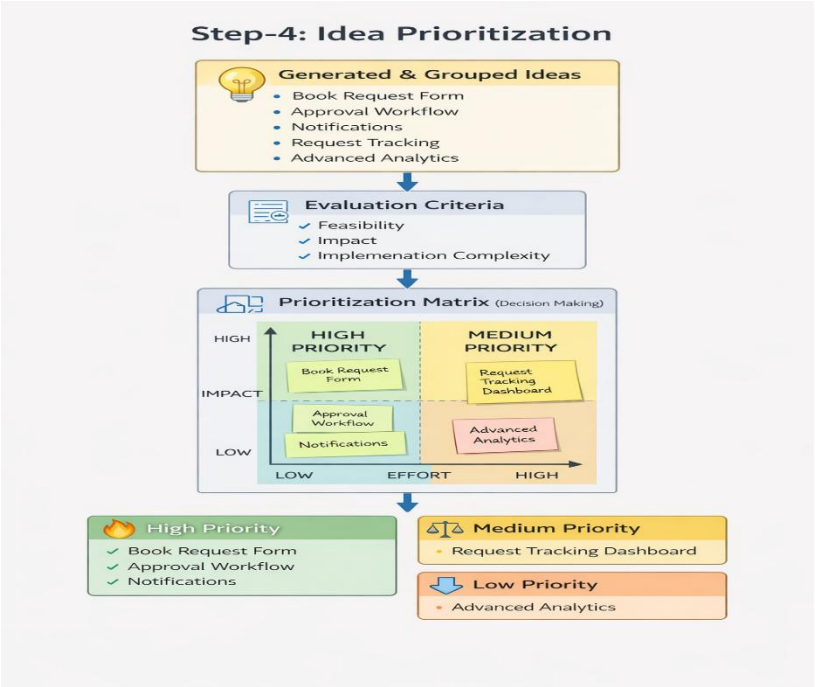
A prioritization matrix was used to select the most important features:

High Priority

- Book Request Form
- Approval Workflow
- Notifications

Medium Priority

- Request Tracking Dashboard

Low Priority


- Advanced analytics
